

Belinay Music Programme

Our Music Programme is designed to instil a foundation of noise awareness, rhythm, and beats, allowing children to experience the profound effects of music.

Through interactive activities, children explore various sounds and musical patterns, enhancing their auditory skills and appreciation for music. Our programme encourages self-expression through singing, dancing, and instrument play, exposing children to a deeper understanding of the world around them. We turn early musical experiences into a joyful journey of discovery and connection.
